HIGHLIGHTS

Industry-first cycle sanitizes fabrics to kill 99% of common bacteria and allergens such as dust mites.

UltraFresh utilise un joint plus large pour une meilleure vidange (Drain), un évent interne qui aspire pour sécher la cuve après (Dry) et la technologie antimicrobienne Microban intégrée pour arrêter les bactéries responsables des odeurs (Defend).

Our patented, time saving technology senses and rebalances uneven loads during the spin cycle, providing a quiet wash.

Meets or exceeds federal guidelines for energy efficiency means you save money and energy costs all year round.

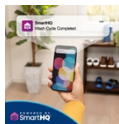

Power through laundry day in less time with an extra large capacity washer that fits more in every load. The 4.6 cu.ft capacity can easily accommodate bulky items or large loads.

Built into components including the gasket, dispenser and draining system delivering protection that lives on load after load.

Laundry that fits your home. Our 32" depth space-saving washer fits tight spaces like closets or alcoves, delivering full-size performance in a shallow depth design.

With SmartHQ™, you can make sure your washer always has the latest features, from extra cycles for jeans and swimwear, to customized stain removal technology for treating up to 30 different stains.

No more rewashing! Keep your clothes fresh and clean for up to 8 hours by enabling The Tumble Care feature.

The first and only UltraFresh Vent System with OdorBlock™ eliminates excess moisture to help prevent odors ensuring your washer stays fresh and clean.
