REAL HEIGHT 85.6 cm
REAL HEIGHT INCHES 33.7 in

REAL DEPTH 57.61 cm
REAL DEPTH INCHES 22.68 in

HIGHLIGHTS

A dishwasher's clean sensor detects food particles in the water and automatically adjusts the cycle for optimal cleaning. This smart feature helps save water and energy.

Set your wash on your schedule. Delay Start lets you choose a time between 1-12 hours for added convenience.

Meets or exceeds federal guidelines for energy efficiency for year-round energy and money savings.

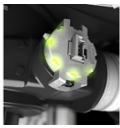

Adjust the rack to accommodate different items thanks to multi-position, fold-down tines.

Wash a true half load in the upper or lower rack whenever you need to, instead of waiting on a full load.

This option raises the water temperature during the main wash cycle to improve cleaning performance and power through tough messes.

A beam of light measures soil levels and water temperature to adjust to the ideal cycle time.
